Recommendations for Use

Face shield is to be used in accordance with CDC recommendations to cover the front and sides of the face and provide barrier protection. Face shield is intended as a multi-use item. Components may be cleaned by the following means.

Components to be completely soaked, or wet, on all surfaces

Component	Method	Conditions
Shield	Soap/detergent + water	Air dry or pat with soft, microfiber cloth. *Rubbing shield during washing or drying will destroy anti-fog coating
Foam Insert Head Band Liner	Bleach (sodium hypochlorite)	0.5% (1:10 bleach: water), 2 mins
	Gamma radiation	10 Mrads maximum
	Soap/detergent + water	Air dry
Elastic Strap, Woven	Launder	Wash / Standard Dry Cycle
Elastic Strap, Polyurethane	Isopropyl alcohol	75-99%, 5 minutes
	Bleach (sodium hypochlorite)	0.5% (1:10 bleach: water), 2 mins
	Gamma radiation	10 Mrads maximum

The US NIH and EPA recommend numerous disinfectant products for use with respect to Covid-19, including products containing isopropyl alcohol, bleach (sodium hypochlorite), hydrogen peroxide and soap and water. For more information please see the following: https://3dprint.nih.gov/sites/default/files/models/supplemental_documentation/IFU_Face_Shield%20Rev.1.1_03_30.20_0.pdf
